

# 200 Claude AI Prompts

For Digital Product Sellers & Automation Builders

---

## PRODUCT 1 — 100 Prompts

The Niche Shopify Store Blueprint 2.0 — From Zero to \$1K/Month

## PRODUCT 2 — 100 Prompts

The n8n Automation Cookbook: 2000+ AI Workflows, Templates  
& Video Tutorials (2026 Edition)

Ready-to-use prompts to paste into Claude for instant results.  
Each prompt is crafted to extract maximum value from AI.

# Table of Contents

---

## Part 1: Shopify Store Blueprint Prompts (1-100)

- Niche Research & Validation — Prompts 1-10
- Store Setup & Design — Prompts 11-20
- Product Sourcing & Pricing — Prompts 21-30
- Marketing & Traffic — Prompts 31-40
- Email Marketing & Retention — Prompts 41-50
- SEO & Content Strategy — Prompts 51-60
- Conversion Optimization — Prompts 61-70
- Analytics & Scaling — Prompts 71-80
- Social Media & Brand Building — Prompts 81-90
- Customer Experience & Operations — Prompts 91-100

## Part 2: n8n Automation Cookbook Prompts (1-100)

- Getting Started & Setup — Prompts 1-10
- AI & LLM Workflows — Prompts 11-25
- Social Media Automation — Prompts 26-35
- Email & CRM Automation — Prompts 36-45
- Business Operations & Productivity — Prompts 46-55
- E-Commerce & Sales Automation — Prompts 56-65
- Data Processing & Integration — Prompts 66-75
- Advanced Patterns & Architecture — Prompts 76-85
- Monitoring, DevOps & Maintenance — Prompts 86-95
- Monetization & Scaling — Prompts 96-100

# PART 1

---

## The Niche Shopify Store Blueprint 2.0 From Zero to \$1K/Month

100 Claude prompts covering niche research, store setup, product sourcing, marketing, email, SEO, CRO, and scaling.

## Niche Research & Validation

1

Analyze the top 10 trending Shopify niches for 2026. For each, give me market size, competition level, average profit margin, and a verdict on whether a beginner should enter.

2

I want to sell [product type]. Research this niche and tell me: Is there demand? Who are the top 5 competitors? What are they doing right and wrong? What gap can I exploit?

3

Generate 20 micro-niche Shopify store ideas that can realistically hit \$1K/month within 90 days with less than \$500 startup budget.

4

Act as a market research analyst. Compare these 3 niches: [niche A], [niche B], [niche C]. Score each on demand, competition, margins, seasonality, and scalability.

5

Create a niche validation checklist I can run through before committing. Include Google Trends steps, competitor research, profit margin calculation, and audience size estimation.

6

Find 15 underserved sub-niches within the [broader niche] market that have high buyer intent but low competition on Shopify.

7

Analyze the seasonality of [niche]. When are peak and off-peak months? How should I plan inventory and ad spend around these cycles?

8

Write a SWOT analysis for launching a Shopify store in the [niche] market in 2026.

9

List the top 10 products selling on Etsy/Amazon in [niche] that I could sell on my own Shopify store with better branding and margins.

10

Help me create an ideal customer avatar for a [niche] Shopify store. Include demographics, psychographics, pain points, buying triggers, and where they hang out online.

## Store Setup & Design

11

Write a complete Shopify store launch checklist from domain purchase to first sale. Include every setting, page, and integration I need.

12

Create a homepage copywriting template for a [niche] Shopify store. Include hero section, value propositions, social proof section, and CTA layout.

13 Write product descriptions for these 5 products: [list]. Make each description SEO-optimized, benefit-driven, and include a sense of urgency.

14 Design the information architecture for a [niche] Shopify store. What collections, pages, and navigation structure should I have?

15 Write compelling About Us page copy for a [niche] brand that builds trust and tells a story. The brand values are [values].

16 Create an FAQ page with 15 questions and answers for a [niche] Shopify store covering shipping, returns, product quality, and ordering.

17 Generate 10 Shopify store name ideas for a [niche] store. Each should be memorable, brandable, and have an available .com domain potential.

18 Write the legal pages I need: Privacy Policy, Terms of Service, Refund Policy, and Shipping Policy for a [niche] store shipping from [location].

19 Recommend the top 10 must-have Shopify apps for a new store in 2026 and explain what each does and whether the free version is sufficient.

20 Create a Shopify theme customization guide for the Dawn theme. How should I set up colors, fonts, and sections for a premium [niche] brand look?

## Product Sourcing & Pricing

21 Compare dropshipping vs print-on-demand vs private label vs handmade for a [niche] store. Give pros, cons, startup costs, and which is best for hitting \$1K/month fastest.

22 Write a supplier outreach email template I can send to manufacturers on Alibaba for [product type]. Make it professional and include key questions.

23 Create a pricing strategy for my [niche] store. My product cost is \$X, shipping is \$Y. What should my retail price be? Include psychological pricing tactics.

24 Analyze the landed cost calculation for importing [product] from China to [country]. Include product cost, shipping, customs duties, and platform fees.

25 Help me create a product bundle strategy. I sell [products]. What bundles would increase average order value? How should I price them?

26 Write a comparison table of the top 5 print-on-demand suppliers (Printful, Printify, Gooten, SPOD, Gelato) for a [niche] store.

27 Create a private label product development timeline. What are the steps from idea to having inventory, and how long does each take?

28 Generate 10 product upsell and cross-sell ideas for a [niche] store selling [main product].

29 Help me negotiate with a supplier. They quoted \$X per unit for [product]. Write a negotiation email aiming for \$Y per unit with reasoning.

30 Create a quality control checklist I should use when evaluating product samples from potential suppliers.

## Marketing & Traffic

31 Create a 30-day marketing launch plan for my new [niche] Shopify store. Include daily tasks across social media, email, SEO, and paid ads with zero ad budget for week 1-2.

32 Write 20 Instagram Reel/TikTok video ideas for a [niche] Shopify store that can go viral organically.

33 Create a Facebook/Meta ads strategy for a \$10/day budget. Include campaign structure, audiences, ad copy, and scaling rules.

34 Write 5 different Facebook ad copies (primary text + headline + description) for [product]. Include one storytelling ad, one UGC-style, one benefit-focused, one urgency-based, and one social proof ad.

35 Build a complete Pinterest marketing strategy for a [niche] store. Include board structure, pin frequency, keyword strategy, and how to drive traffic to product pages.

36 Create an influencer outreach strategy. Write DM templates for reaching out to micro-influencers (1K-50K followers) in [niche] for gifted collaborations.

37 Design a referral program for my Shopify store. What rewards should I offer? How should the program work? Write the landing page copy.

38 Write 10 blog post titles with SEO keywords for a [niche] store that would drive organic traffic and pre-sell products.

39 Create a Google Shopping ads setup guide for my [niche] store. Include feed optimization tips, bidding strategy, and budget allocation.

40 Write a TikTok Shop strategy for a [niche] store. How do I set up, what content works, and how do I find TikTok affiliates?

## Email Marketing & Retention

41 Build a complete email automation flow for my Shopify store: Welcome Series (5 emails), Abandoned Cart (3 emails), Post-Purchase (4 emails), and Win-Back (3 emails). Write the subject lines and body copy for each.

42 Write a weekly newsletter template for a [niche] store that balances value content with product promotion (80/20 rule).

43 Create 10 email subject lines that would get high open rates for a [product] promotional campaign. Include A/B test variants.

44 Design a VIP/loyalty program structure for my Shopify store. What tiers, rewards, and point systems should I use?

45 Write a Black Friday / Cyber Monday email campaign sequence (5 emails over 5 days) for a [niche] store.

46 Create a customer win-back strategy for shoppers who haven't purchased in 60+ days. Include email copy and a special offer structure.

47 Write an SMS marketing campaign sequence (5 texts) for a flash sale on [product]. Keep each under 160 characters.

48 Design a post-purchase experience flow. What emails, inserts, and touchpoints should happen after someone buys from me?

49 Create a review request email sequence that gets customers to leave product reviews. Include timing and incentive strategy.

50 Write a pre-launch email sequence (7 emails) to build hype before I drop a new product collection in my [niche] store.

## SEO & Content Strategy

51 Do keyword research for a [niche] Shopify store. Give me 30 long-tail keywords with estimated search volume and difficulty, organized by buyer intent stage.

52 Write a complete SEO optimization guide for my Shopify product pages. Include title tags, meta descriptions, headers, image alt text, and schema markup.

53 Create a 3-month content calendar with 12 blog posts for a [niche] store. Each should target a specific keyword and include a content brief.

54 Write a 1,500-word SEO blog post for my [niche] store targeting the keyword '[keyword]'. Include internal links to products.

55 Optimize my Shopify collection page for '[keyword]'. Write the collection title, description (300 words), and meta tags.

56 Create a link-building strategy for a new Shopify store. Give me 10 actionable tactics to get backlinks in the [niche] space.

57 Write product schema markup (JSON-LD) for [product name] with price, availability, rating, and review count.

58 Audit my Shopify store's technical SEO. Create a checklist covering site speed, mobile optimization, crawlability, and indexation issues.

59 Create a YouTube SEO strategy for a [niche] store. What videos should I make, how should I optimize titles/descriptions, and how do I link to products?

60 Write 5 comparison blog posts outlines (e.g., '[Product A] vs [Product B]') that would rank for commercial intent keywords in my niche.

## Conversion Optimization

61 Audit my Shopify store's conversion funnel. Give me a checklist of 20 things to check on homepage, product pages, cart, and checkout.

62 Write 10 different call-to-action button texts for a [product] page that are more compelling than 'Add to Cart'.

63 Create an A/B testing plan for my [niche] store. What elements should I test first and what tools should I use?

64 Design a trust-building strategy for a new store with zero reviews. What badges, guarantees, and social proof elements should I add?

65 Write urgency and scarcity copy for my product pages. Include countdown timer copy, low-stock alerts, and limited-time offer language.

66 Create a cart abandonment recovery strategy beyond email. Include exit-intent popups, retargeting ads, and SMS. Write the copy for each.

67 Analyze why my conversion rate might be low. Give me a diagnostic questionnaire of 15 questions to identify the bottleneck.

68 Write 5 different pop-up offer copies (10% off, free shipping, bundle deal, free gift, spin-to-win) for capturing emails on a [niche] store.

69 Design a mobile optimization checklist for my Shopify store. What specific elements need attention for mobile shoppers?

70 Create a product page template that follows the proven structure: headline, hero image, benefits, social proof, offer, guarantee, CTA. Fill it in for [product].

## Analytics & Scaling

71 Set up a Shopify analytics dashboard. What KPIs should I track daily, weekly, and monthly to hit \$1K/month?

72 My store is making \$500/month. Create a step-by-step plan to double revenue to \$1K/month in the next 60 days.

73 Analyze my store data: [traffic], [conversion rate], [AOV], [return rate]. Where is the biggest opportunity to increase revenue?

74 Create a scaling playbook: When should I increase ad spend, add new products, expand to new channels, or hire help?

75 Write a monthly business review template I can fill in to track my Shopify store's progress toward \$1K/month.

76 Design a financial model/spreadsheet structure for tracking my Shopify store's P&L. What line items should I include?

77

Help me calculate my customer acquisition cost (CAC) and customer lifetime value (LTV). My data: [provide data]. Is this sustainable?

78

Create an expansion strategy: Should I add a second product line, open a new store, or go international? Analyze based on my current niche [niche].

79

Write a standard operating procedure (SOP) for daily Shopify store management tasks I can eventually delegate to a VA.

80

My best-selling product is [product]. Create a strategy to build an entire product line around it and increase AOV by 50%.

## Social Media & Brand Building

81

Create a 30-day Instagram content plan for a [niche] Shopify store. Mix product posts, educational carousels, Reels, Stories, and engagement posts.

82

Write 10 short-form video scripts (15-30 seconds each) showcasing [product] for TikTok/Reels. Include hooks, body, and CTAs.

83

Build a brand style guide for my [niche] store. Define brand voice, tone, visual identity, color palette, and messaging pillars.

84

Create a UGC (User-Generated Content) strategy. How do I encourage customers to post about my products and how do I repurpose that content?

85

Write 15 engaging social media captions for a [niche] store that drive comments and saves. Mix educational, entertaining, and promotional.

86

Design a giveaway/contest campaign for Instagram. Write all the copy: announcement post, rules, Stories sequence, and winner announcement.

87

Create a YouTube channel strategy for a [niche] Shopify store. What video types, posting frequency, and topics will drive traffic to my store?

88

Write 10 Twitter/X thread ideas that showcase my expertise in [niche] and naturally lead to my products.

89

Build a community-building strategy. Should I start a Facebook Group, Discord server, or Reddit community for my [niche] brand? Plan it out.

90

Create a brand collaboration pitch template. I want to partner with complementary (non-competing) brands in the [niche] space for cross-promotion.

## Customer Experience & Operations

91

Design a world-class unboxing experience for my [niche] products. What packaging, inserts, thank-you cards, and surprise elements should I include?

92

Create a customer service playbook with templated responses for the 15 most common inquiries: shipping delays, refund requests, sizing issues, etc.

93

Write a returns and exchange process that turns unhappy customers into loyal fans. Include the communication flow and operational steps.

94

Build a Shopify store operations manual I can hand to a virtual assistant. Cover order processing, customer service, inventory management, and daily tasks.

95

Design a subscription/replenishment model for my [niche] store. What products could I sell on a recurring basis and how should I structure pricing?

96

Create a customer feedback collection system. What surveys, reviews, and feedback loops should I implement and when should each trigger?

97

Write an international shipping strategy for my Shopify store. Which countries should I target first, what are the shipping options, and how do I handle duties/taxes?

98

Design a wholesale/B2B sales channel for my [niche] products. How should I price, what platform features do I need, and how do I find retail partners?

99

Create a crisis management plan for common e-commerce emergencies: supplier failure, viral negative review, payment processing outage, website crash.

100

Build a 12-month growth roadmap for my Shopify store. Quarter by quarter, what milestones, revenue targets, and strategic initiatives should I focus on?

# PART 2

---

The n8n Automation Cookbook  
2000+ AI Workflows, Templates & Video Tutorials (2026 Edition)

100 Claude prompts covering AI workflows, social media automation, email/CRM, e-commerce, data pipelines, DevOps, and advanced patterns.

## Getting Started & Setup

1

Explain n8n workflow automation to me like I'm a complete beginner. What can it do, how is it different from Zapier/Make, and why should I use it?

2

Walk me through setting up a self-hosted n8n instance on a DigitalOcean VPS step by step. Include Docker commands, domain setup, and SSL configuration.

3

Compare n8n cloud vs self-hosted. What are the cost differences at 100, 1000, and 10,000 workflow executions per month?

4

Create a beginner's roadmap: What are the first 10 n8n workflows every beginner should build to learn the platform?

5

Explain n8n's node types: triggers, actions, conditionals, loops, and sub-workflows. Give a real-world example of each.

6

Set up n8n with proper error handling. Show me how to configure error workflows, retry logic, and notification alerts for failed executions.

7

Write a complete n8n backup and restore strategy. How do I export workflows, credentials, and settings for disaster recovery?

8

Create a security hardening guide for a self-hosted n8n instance. Cover authentication, environment variables, network security, and credential encryption.

9

Explain n8n's execution modes: webhook, polling, cron, and manual. When should I use each one?

10

Design an n8n workspace organization system. How should I name, tag, and folder-organize 100+ workflows so they stay manageable?

## AI & LLM Workflows

11

Build an n8n workflow that takes a blog topic, generates a full article using Claude/OpenAI, creates a featured image with DALL-E, and publishes to WordPress automatically.

12

Create an AI customer support workflow: incoming email -> classify intent with AI -> draft response -> send to human for approval -> send reply.

- 13 Design an n8n workflow that monitors RSS feeds, summarizes each article with AI, scores relevance to my niche, and posts the best ones to my social media.
- 14 Build a RAG (Retrieval Augmented Generation) workflow in n8n. Index documents in Pinecone/Qdrant and query them through Claude for intelligent Q&A.
- 15 Create an AI content repurposing pipeline: Input a YouTube video URL -> transcribe -> generate blog post + Twitter thread + LinkedIn post + newsletter with AI.
- 16 Design an n8n workflow that analyzes customer reviews from multiple platforms using AI sentiment analysis and generates a weekly insights report.
- 17 Build an AI-powered lead scoring workflow: when a new lead comes into my CRM, enrich it with Clearbit, score it with AI based on my ideal customer profile, and route to the right sales rep.
- 18 Create an AI meeting assistant workflow: Receive calendar invite -> join meeting via API -> transcribe -> generate summary and action items -> send to all attendees.
- 19 Design a multi-LLM comparison workflow in n8n that sends the same prompt to Claude, GPT-4, and Gemini, then compares the outputs side by side.
- 20 Build an automated AI research agent in n8n: Given a topic, search the web, gather sources, synthesize findings, fact-check claims, and output a research brief.
- 21 Create an n8n workflow that generates personalized cold emails using AI. Input: prospect's LinkedIn URL. Output: researched, personalized outreach email.
- 22 Design an AI-powered product description generator workflow for Shopify: pull product data from Shopify -> generate SEO descriptions with AI -> update the store automatically.
- 23 Build a workflow that uses AI to automatically categorize, tag, and prioritize incoming support tickets in Zendesk/Freshdesk.
- 24 Create an AI content moderation pipeline: monitor community posts -> flag harmful content with AI -> auto-remove or escalate to moderator -> log results.
- 25 Design an n8n workflow that uses Claude to analyze my competitors' websites weekly and generate a competitive intelligence report.

## Social Media Automation

26

Build an n8n workflow that auto-posts to Instagram, Twitter/X, LinkedIn, and Facebook from a single Google Sheet content calendar.

27

Create a social media monitoring workflow: track mentions of my brand across platforms, analyze sentiment with AI, and alert me to negative mentions immediately.

28

Design an automated YouTube workflow: new video published -> extract transcript -> generate blog post + social posts + email newsletter -> schedule everything.

29

Build a TikTok content repurposing workflow: take my TikTok videos, add captions, resize for Reels/Shorts, and auto-post to all platforms.

30

Create an n8n workflow that automatically responds to Instagram DMs with AI-powered responses based on a knowledge base of FAQs.

31

Design a social proof collector: monitor for positive mentions/reviews across social media -> screenshot them -> save to a folder -> create a weekly social proof roundup.

32

Build a hashtag research workflow: input a topic -> scrape trending hashtags across platforms -> rank by relevance and reach -> output an optimized hashtag set.

33

Create an automated Pinterest pinning workflow that creates pins from my blog posts and schedules them across multiple boards with optimal timing.

34

Design a UGC (User-Generated Content) collection workflow: monitor tagged posts -> request permission via automated DM -> save approved content to a library.

35

Build an n8n workflow that generates a weekly social media analytics report from all my platforms and emails it to me every Monday morning.

## Email & CRM Automation

36

Create a complete lead nurture automation in n8n: new subscriber -> welcome sequence -> segment by behavior -> targeted follow-ups -> sales pitch -> convert.

37

Build a CRM data enrichment workflow: new contact added to HubSpot -> enrich with Clearbit/Apollo -> update CRM fields -> notify sales team.

38

Design an automated invoice and payment reminder workflow: generate invoice -> send via email -> follow up at 7, 14, 30 days if unpaid -> escalate.

39 Create an n8n workflow that syncs contacts between Mailchimp, Google Sheets, and HubSpot bidirectionally with conflict resolution.

40 Build a customer onboarding automation: new sale detected -> send welcome email -> create project in Notion -> schedule kickoff call -> assign tasks.

41 Design a birthday/anniversary email workflow that pulls dates from my CRM and sends personalized emails with special discount codes on the right day.

42 Create a webinar funnel automation: registration -> confirmation email -> reminder sequence (3 emails) -> post-webinar follow-up -> replay access -> sales pitch.

43 Build an n8n workflow that automatically segments my email list based on engagement (opens, clicks, purchases) and moves subscribers between segments.

44 Design a re-engagement workflow for cold leads: identify inactive contacts -> send re-engagement email series -> remove non-responders after 30 days.

45 Create a customer feedback loop workflow: 7 days post-purchase -> send NPS survey -> route promoters to leave a review -> route detractors to support team.

## Business Operations & Productivity

46 Build a complete project management automation: new client form submitted -> create Notion project -> populate tasks -> assign team -> send intro email -> start timeline.

47 Create an n8n workflow that monitors my Stripe account and generates daily, weekly, and monthly revenue reports sent to Slack.

48 Design an expense tracking workflow: receive receipt photo via email/Telegram -> OCR extract details -> categorize -> add to Google Sheet -> monthly summary.

49 Build an automated hiring pipeline: new application received -> screen with AI -> score candidates -> schedule interviews -> send status updates.

50 Create a workflow that syncs my Google Calendar, Notion database, and Slack status in real-time so my availability is always accurate.

51 Design an inventory management workflow: monitor stock levels -> alert when low -> auto-generate purchase orders -> send to supplier -> track delivery.

52 Build a client reporting workflow: pull data from Google Analytics, social media, and ad platforms -> generate a branded report with AI insights -> email to client weekly.

53 Create a document generation workflow: receive form data -> populate a contract template -> send for e-signature via DocuSign -> file signed copy in Google Drive.

54 Design an automated bookkeeping workflow: bank transactions -> categorize with AI -> match to invoices -> update QuickBooks/Xero -> flag anomalies.

55 Build an n8n workflow that creates a daily standup digest: pull tasks from Asana/Trello -> summarize team progress with AI -> post to Slack at 9 AM.

## E-Commerce & Sales Automation

56 Build a Shopify order processing workflow: new order -> check inventory -> send to fulfillment -> generate shipping label -> email tracking to customer -> update CRM.

57 Create an abandoned cart recovery workflow in n8n that goes beyond email: send email at 1hr, SMS at 24hr, retargeting ad trigger at 48hr.

58 Design a dynamic pricing workflow: monitor competitor prices daily -> compare with mine -> suggest price adjustments -> auto-update Shopify if within rules.

59 Build an n8n workflow that automatically generates and sends personalized product recommendations based on a customer's purchase history.

60 Create a review management workflow: new review received on any platform -> analyze sentiment -> respond automatically to positive -> escalate negative to support.

61 Design a wholesale/B2B order processing workflow: receive PO via email -> parse with AI -> create order in system -> send confirmation -> track fulfillment.

62 Build an affiliate program management workflow: track referral links -> calculate commissions -> generate monthly payout reports -> send payment via PayPal/Wise.

63 Create a product launch automation: schedule date -> teaser emails -> social media countdown -> launch announcement -> influencer notifications -> track sales in real-time.

64 Design a customer churn prediction workflow: analyze purchase patterns with AI -> identify at-risk customers -> trigger retention campaigns automatically.

65

Build a cross-platform listing workflow: add product to master sheet -> auto-list on Shopify, Etsy, Amazon, and eBay with optimized descriptions for each platform.

## Data Processing & Integration

66

Build an n8n workflow that scrapes job listings from 5 websites, deduplicates them, scores relevance with AI, and adds the best ones to a Notion database.

67

Create a data pipeline workflow: extract data from PostgreSQL -> transform with JavaScript -> load into Google BigQuery -> trigger a dashboard refresh.

68

Design an API monitoring workflow: health-check 10 endpoints every 5 minutes -> log response times -> alert on downtime or slow responses via Slack/PagerDuty.

69

Build a web scraping workflow in n8n that monitors price changes on competitor websites and creates an alert when prices drop below mine.

70

Create a multi-source data aggregation workflow: pull data from Google Sheets, Airtable, and a REST API -> merge and deduplicate -> output a unified dataset.

71

Design a file processing workflow: watch a Google Drive folder -> when new CSV arrives -> validate data -> clean errors -> import to database -> archive original.

72

Build an n8n workflow that converts data between formats: CSV to JSON, JSON to XML, XML to CSV, with validation and error reporting.

73

Create an automated data backup workflow: export data from 5 SaaS tools nightly -> compress -> upload to S3 -> verify integrity -> send confirmation.

74

Design a webhook relay system in n8n: receive webhooks from multiple services -> normalize data format -> route to the correct downstream workflow.

75

Build a real-time notifications hub: aggregate alerts from GitHub, AWS, Stripe, and monitoring tools -> prioritize -> send to the right Slack channel.

## Advanced Patterns & Architecture

76

Explain n8n sub-workflows and when to use them. Build an example where a parent workflow calls 3 sub-workflows in parallel.

77

Design an error handling and retry framework for n8n that I can reuse across all my workflows. Include exponential backoff and dead letter queues.

78

Build a rate-limiting system in n8n for API calls. Show me how to queue requests and respect rate limits for APIs like Twitter and OpenAI.

79

Create a workflow versioning and deployment strategy for n8n. How do I manage dev/staging/production environments?

80

Design a multi-tenant workflow architecture in n8n: one workflow template that processes data for multiple clients with separate configurations.

81

Build a long-running workflow pattern in n8n: start a process -> wait for external callback (webhook) -> resume processing -> handle timeout.

82

Create a workflow that implements the saga pattern for distributed transactions: Book Hotel -> Book Flight -> Book Car. If any fails, compensate the others.

83

Design a workflow orchestration layer: a master workflow that coordinates 5 independent workflows, handles dependencies, and reports overall status.

84

Build a dynamic workflow generator in n8n: based on a configuration JSON, create and execute different workflow paths without hardcoding.

85

Create a performance optimization guide for n8n: How do I handle 10,000+ executions per day? Cover memory, database, and execution optimization.

## Monitoring, DevOps & Maintenance

86

Build an n8n workflow that monitors my website uptime every 5 minutes and sends alerts via SMS, Slack, and email if it goes down.

87

Create a server monitoring dashboard workflow: collect CPU, memory, disk metrics -> store in InfluxDB -> trigger alerts above thresholds.

88

Design a CI/CD notification workflow: GitHub push -> run tests -> build status -> deploy to staging -> notify team -> manual approve -> deploy to production.

89

Build a security alert workflow: monitor for suspicious login attempts, failed SSH connections, and unusual API activity -> aggregate -> alert with context.

90

Create a log aggregation workflow: collect logs from 5 services -> parse and structure -> search for error patterns with AI -> generate daily error summary.

91

Design a certificate and domain expiration monitoring workflow: check SSL certs and domains weekly -> alert 30, 14, and 7 days before expiration.

92

Build a database maintenance workflow: run nightly cleanup queries -> optimize tables -> check for slow queries -> generate performance report.

93

Create a workflow health monitoring system in n8n: track execution success rates across all workflows -> alert when any workflow's failure rate exceeds 5%.

94

Design an automated scaling workflow: monitor n8n queue depth -> if backlogs grow -> spin up additional workers -> scale down when caught up.

95

Build a changelog and release notes generator: monitor GitHub releases for my dependencies -> summarize changes with AI -> post to Slack and update internal docs.

## Monetization & Scaling

96

Create a workflow that packages my best n8n automations into sellable templates. Auto-generate documentation, screenshots, and listing descriptions for Gumroad.

97

Design a client onboarding workflow for selling n8n automation services: intake form -> scope document generated by AI -> proposal sent -> contract signed -> project created.

98

Build a workflow usage analytics system: track which of my workflows run most, their error rates, and time saved -> generate a monthly ROI report.

99

Create an n8n workflow that monitors my SaaS tool subscriptions, tracks costs, identifies unused tools, and suggests optimizations to reduce monthly spend.

100

Design a workflow marketplace listing optimizer: analyze top-selling n8n templates -> extract winning patterns -> generate optimized titles, descriptions, and preview images for my own templates.

## Bonus: How to Get the Best Results from These Prompts

- **Replace the brackets:** Anywhere you see [niche], [product], [data], etc., replace with your specific information for personalized results.
- **Chain prompts together:** Use the output of one prompt as input for the next. For example, use the niche research output to feed into the store setup prompts.
- **Ask Claude to go deeper:** After any response, say 'Go deeper on point 3' or 'Give me a step-by-step for the second recommendation' to get more detail.
- **Request specific formats:** Add 'Present this as a table' or 'Give me this as a checklist' or 'Write this as copy I can paste directly' to get actionable outputs.
- **Iterate and refine:** The first response is a starting point. Tell Claude what you liked and didn't like, and ask for a revised version.
- **Use Claude's extended thinking:** For complex strategy prompts, ask Claude to 'think step by step' to get more thorough analysis.
- **Combine products:** Use Shopify prompts with n8n prompts together. Example: Generate a marketing plan (Shopify prompt), then build the automation workflow for it (n8n prompt).
- **Save your best outputs:** When Claude generates something great, save it to a swipe file. You'll build a personalized playbook over time.
